Caring for Kids is All We Do.

Pediatric Care

Physical Medicine and Rehabilitation

The Division of Physical Medicine and Rehabilitation specializes in the rehabilitation and medical management of children with special healthcare needs. Physicians on staff understand how cognitive and physical impairments affect growth and development. They use this knowledge to work with patients and their families to develop individualized treatment plans to restore or improve function and quality of life. Disabilities, illness or injuries treated include:

- Amputations
- Arthrogryposis
- Brachial plexus injury
- Brain tumors and other childhood cancers
- Burns
- Cerebral palsy
- Cerebral vascular accidents
- CIDP
- Complex regional pain syndrome
- Developmental delay
- Dysphagia
- Gait deviations
- Guillain-Barré syndrome
- Muscular dystrophy
- Neuromuscular disease
- Pes Planus (over age 3)
- Spasticity, hypotonia
- Spina bifida
- Spinal cord injury
- Spinal muscular atrophy
- Stroke
- Torticollis
- Traumatic and non-traumatic brain injury
- Transverse myelitis

The Children's Hospital of Michigan provides a 14-bed inpatient rehabilitation program certified by the Commission on Accreditation of Rehabilitation Facilities (CARF), demonstrating dedication to accountability and compliance with internationally accepted standards of excellence.

Physicians work closely with the team to manage spasticity, swallowing disorders, developmental therapy needs, and bracing and equipment needs. Procedures used for comprehensive spasticity management include neurolytic injection, alcohol blocks, and intrathecal baclofen pumps.

Specialty clinics and programs include: Myelomeningocele/ Spinal Cord Injury Clinic, Muscular Dystrophy Clinic, Intrathecal Baclofen Pump Program and Spasticity Clinic and Alcohol Block Clinic for treatment of spasticity.
